Documentation

Scenario Source

This PDF is generated directly from the authenticated browser state in the Chapter Realignment Engine. Baseline assignments remain intact; scenario overrides are applied only inside this report.

Mapping Constraint

The report map uses a lower-48/DC frame for readability. Alaska, Hawaii, Puerto Rico, Virgin Islands, Guam, American Samoa, and Northern Mariana Islands are excluded only from map drawing/extents. Metrics, tables, and row counts still include any rows present in the scenario packet.

Metric Method

County metrics are rolled up by effective scenario chapter and region. Sum metrics add county totals. Average metrics use the app rollup logic already visible in Impact view.

Generated File

Scope: Arizona and New Mexico Region, Central and South Texas Region, Colorado and Wyoming Region + 7 more. Counties: 1,068. Moves: 1. Palette: American Red Cross.
